ArtDesigner

After 15 years of chemistry in R&D in a Franco-American start-up, Jérôme Peyronnet launched the **ArtJL project** in 2015. Through original creations, he combines design and contemporary art.

His goal: to allow you to create unparalleled interiors.

Passionate from his earliest childhood by the idea of creating: drawings, comics, successful musician in the 2000s, calligraphy thereafter ... **The ArtDesigner** today shares his passions through exceptional lamps and canvases.

His first work in **painting** is a series of paintings inspired by Japanese, Persian and Hebrew calligraphy. Jérôme wondered about our way of writing in an all-digital era. What if this gesture was on the way out? Writing and drawing by hand is a way of defending a skill.

His second series of modern paintings is an invitation to a more **minimalist design**.

The hand is assured and precise. The **harmony of colors** and the **purity of the lines** are there. Methodical and straight.
