## ETHICS AND POETICS LAMPS

«Nothing is lost, everything is transformed.»

Such is the adage of ex-chemist Jérôme Peyronnet. Through his brand **ArtJL**, he designs **lamps** based on **heaters** from the 1930s to the 1970s.

All these lamps are **unique pieces**.

A defender of **Made in France**, Jérôme favours **upcycling**: recycling old obsolete objects to give them a second life and a new function.

In his workshop in Montpellier, he spends a lot of time to create these **rare and exclusive lamps** (hunting, dismantling, sanding, painting, shooting...).

The **ecological aspect** comes first. Proof that it is possible to invent **quality products** from recycled materials.
