

# ARTJL DESIGN OF LAMPS

Chemist for 15 years, Jérôme Peyronnet became a **lamp designer** in 2015. He designs high-end lamps from **heaters** from the 1930s to 70s.

He markets them under the **ArtJL brand**.  
All these lamps are **unique pieces**.

Advocate of **Made in France**, Jérôme promotes **upcycling**: recycling from the top by transforming an old obsolete object, giving it a new life, a new function.

In his workshop in Montpellier, he spends a lot of time creating these **rare and exclusive lamps** (bargain hunting, dismantling, sanding, painting, designing, shooting...).

In this work, the **ecological** aspect takes precedence. At a time of disposable everything, Jérôme proves that we can design **quality products** from recycled materials.
